Distribution Center Employer

ERGONOMIC ASSESSMENTS

Briotix Health works with you to quantify ergonomic risk factors for musculoskeletal hazards using validated tools to identify risk drivers and a solution for individual tasks.

- Prioritized recommendations to mitigate ergonomic risks according to OSHAs hierarchy of controls
- Solution development includes engineering, administrative, and behavioral controls
- Optimize productivity and minimize risk and cost
- Available for both Office and Industrial settings

PHYSICAL DEMANDS ANALYSIS (PDA)

Our experts deliver a formal analysis of a job's essential functions and list the physical, environmental, behavioral, and cognitive aspects of a job.

- Comprehensive documentation detailing the knowledge, skills, abilities, and other characteristics necessary for job performance
- Used by medical professionals and claims managers for return-to-work decisions
- Foundation for building a legally defensible Post Offer Employment Testing protocol

PHYSICAL PERFORMANCE AND JOB COACHING

Briotix Health providers will work with employees one-on-one to establish a baseline of functional abilities and create an individualized physical conditioning program to help improve the employee's overall musculoskeletal health and strength while reducing the risk of work-related injury.

WEARABLE TECHNOLOGY AND EXOSKELETON CONSULTING

Briotix Health helps companies navigate the use of exoskeletons and wearable technology. Our services guide clients through understanding how to best utilize occupational exoskeletons and wearable devices to identify and mitigate risks in the workplace. Briotix Health does not represent any equipment manufacturers or resell any devices so our consultation services remain unbiased and objective.

EMPLOYEE HEALTH CENTERS

These unique health, musculoskeletal rehab, and fitness centers are housed in individual worksite locations and focus on improving employee health and wellness. Staffed by Briotix Health providers, Employee Health Centers bring together the critical components of occupational health, injury prevention, and return-to-work programs. The Centers are designed to break down barriers to optimize results in employee health and worker safety.

SAFE PATIENT HANDLING AND MOBILITY (SPHM) SOLUTIONS

At Briotix Health, our SPHM solutions have a proven record of reducing the risk of injury and improving employee health. Our SPHM services also facilitate early patient mobility, improving clinical outcomes. Our program is designed to address the risks associated with safe patient handling, patient care ergonomics, industrial ergonomics, and office ergonomics to maximize risk reduction while ensuring compliance with OSHA and industry regulations.

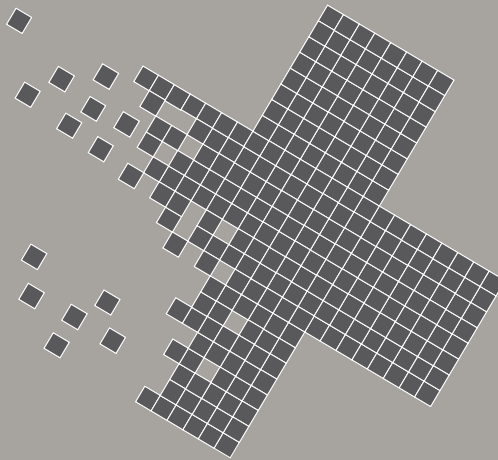

UTILIZATION REVIEW AND PEER TO PEER

Controlling physical therapy, chiropractic, occupational therapy, and massage utilization with peer-driven consultations and URAC accredited workers' compensation utilization management that links employees' job demands to rehabilitation planning thus optimizing clinical outcomes and reducing costs.
