

CASE STUDY: A Virtual Solution for an Ergonomic Problem

A global provider of technology solutions experienced significant growth and was looking for an affordable and effective solution to reduce the ergonomic risk of their more than 66,000 employees. With offices in more than 90 countries, and continued expansion on the horizon, the company needed to reduce employees' ergonomic risk with a solution that could easily grow with the company.

Briotix Health Solution

After evaluating service options, the company determined Briotix Health's Briotix.Works technology solution would enable broad-based program adoption and provide the right support at the right time to the greatest number of employees, regardless of their location. The solution focused on empowering employees with self-assessment tools and on-demand training to reduce individual ergonomic risk via education and intervention.

The Briotix.Works solution rolled out in three easy steps:

Results

-  Clear identification of ergonomic risk, allowed strategic decision making to prevent discomfort and injury
-  Reduction in equipment spending due to an improved procurement optimization process
-  Scalable, global model that ensured program consistency regardless of location
